

CONSPICUITY TAPE PRODUCTS

REFLECTIVE CONSPICUITY TAPE

Aura Optical Systems offers a full range of retroreflective conspicuity tape products for vehicle and transportation safety. The use of conspicuity tape enhances nighttime safety by providing easier detection and recognition of trucks, trailers, railcars, and buses. This helps drivers to avoid nighttime collisions. In fact, studies conducted by the National Highway Traffic Safety Administration have shown a nearly 30% reduction in nighttime collisions through the use of conspicuity tape.

Key features of Aura Optical Systems' conspicuity products include:

- Single-layer tape construction to prevent edge-lifting or delamination
- No edge-sealing required
- Metalized, microprismatic optical elements for excellent retroreflection at multiple viewing angles
- Easily cut or punched for easy installation over rivets or welding-joints
- Tough, acrylic outer-shell for extended durability and UV-light protection
- Retains reflectivity when wet

AURA® 135 Conspicuity Tape: Designed for use on the sides and rear of trucks, trailers, and other vehicles. It conforms to the requirements of the FMVSS 108 standard and contains the DOT-C2 marking.

AURA® 143 School Bus Conspicuity Tape: Designed to outline emergency exits and the sides and rear of school buses. It conforms to the requirements of FMVSS 217 and 131.

AURA® 149 Railcar Conspicuity Tape: Designed for use on the sides of railcars and locomotives with an aggressive adhesive for application during colder temperatures. It contains the FRA-224 marking.
